Introduction

ONLINE LEARNING AND TEACHING MARKETPLACE

"Growup" is Armenian online platform for professional courses, which allows the student to get video lessons made by leading specialists in the field, and the teacher to have an alternative job, a lucrative hobby or just recognition.

STRATEGY

The UX of our product should be based on the needs of the user and has User Centric Design / UCD /. Our strategy is based on a simple idea and includes following stages

Idea > Strategy > Market Analysis > Survey > Competitive Analysis & SWOT > Target Market Description & Persona > User Flow > Wireframing > UI Design > Prototyping > Usability Testing

MISSION

Create and develop an e-learning platform for Armenian market and educate people providing professional growth

GOALS

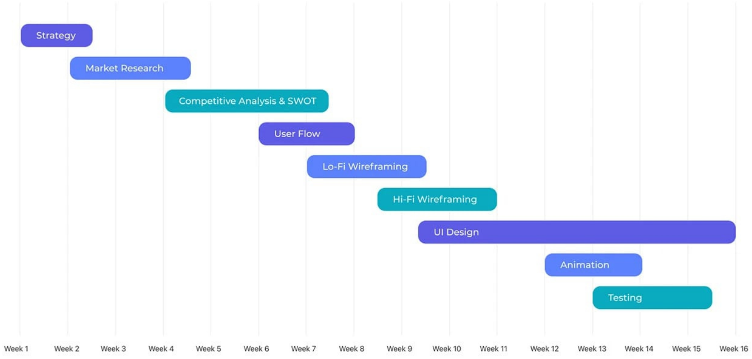
- Educate online
- Increase the content of the Armenian video library
- Motivate students to work constantly to increase their professional growth
- Motivate teachers to educate and train students
- Provide professional content
- Set a reasonable price for both the student and the lecturer

PROBLEMS

- Lack of communication
- Difficulties of the teacher (especially the elderly) in using modern technologies
- Possible desire of the teacher to establish an individual platform

PLANNING

Our timeline had clear deadlines. It should have lasted 16 weeks. At first Market Research were done, then Competitive Analysis, User Flow and other stages that are shown below

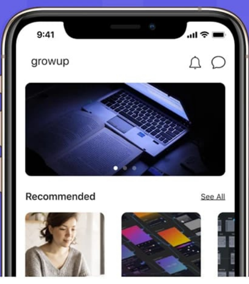


Market Research Survey Competitive & SWOT Analysis Target Market User Persona Promise to the customer & UPS
Information Architecture User Flow Wireframing Design System Hi-Fi Mockups Prototyping Testing

MARKET ANALYSIS

The aim of the research is to study and analyse the Armenian market, to discover the prospects of establishing and developing an online platform in Armenia.

Let's see what problem our Market have met and what opportunities were discovered there



MARKET PROBLEM

The main problem of the e-learning market in Armenia is that actually there is no Armenian language platform where people can get high quality professional courses and trainings related to different fields.

On the other hand, there is a strong demand for a better quality educational platform, as surveys have shown that 68.3% /out of 87 people/ find the University education middle level.

That people changed their profession after graduation or was forced to take another job due to lack of relevant knowledge from the university.

ONLINE LEARNING AND TEACHING MARKETPLACE

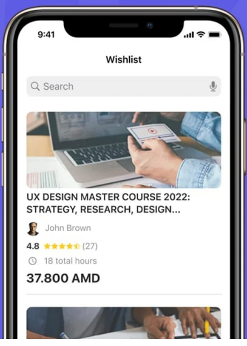
Place where teachers and students help each other to make education better

MARKET OPPORTUNITY

COVID-19 played a big role. New companies came up, and many closed down. The new trend was: go to the online world.

According to the RA Statistical Data Committee, the number of Internet users tends to increase, enrolling almost all population. In 2020, it registered the highest according to the last 7 years, becoming 3092.2 thousand people.

Thanks to the research there is a great opportunity to enter the online market. Due to the pandemic and due to lack of time, people do not have time to attend regular classroom classes. They want to manage their time more optimally and not endanger their health.

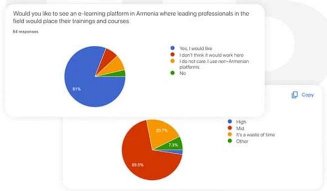


Market Research | Survey | Competitive & SWOT Analysis | Target Market | User Persona | Promise to the customer & UPS
Information Architecture | User Flow | Wireframing | Design System | Hi-Fi Mockups | Prototyping | Testing

SURVEY

The aim of the survey is to develop a clear understanding of the potential user's behavior, purpose, and problems through empathic attitude.

● Let's see what questionnaire people have filled in and what interview questions some of them answered



Would you like to see an e-learning platform in Armenia where leading professionals in the field would place their trainings and courses

84 responses

QUESTIONNAIRE

Based on all Market research and analysis we've done, a Questionnaire was created and sent to respondents to receive some quantitative data. Full questionnaire consisted of 14 questions.

For example, one of the questions of the survey revealed that 81% of respondents wants to see a platform in Armenia where courses and professional trainings will be placed by leading professionals in the field.

AN INTERSTING FACT FROM THE SURVEY

81% of respondents want to see a platform in Armenia where courses and professional trainings will be placed by leading professionals in the field.

INTERVIEW

Some respondents agreed to a 15-minute interview. Let's see what questions they answered to and what data we were able to collect.

Why do you want to change your profession?
What e-learning platforms are you familiar with? | What are you interested in?
Which do you like most: online or offline trainings? | Why do you want to change your profession?
How often do you take courses? | Can you describe your life before and after Covid-19? | + many other questions :)

Market Research | Survey | Competitive & SWOT Analysis | Target Market | User Persona | Promise to the customer & UPS

Different functions were taken into account for the three platforms shown above.

The comparison was made with our competitors on Airtable.com.

Airtable

And a few more...

SWOT ANALYSIS

The main purpose of the analysis is to identify the internal and external problems of the company, as well as to point out the existing opportunities in overcoming the existing obstacles on the way to achieving the goals.

9:41
Welcome to
growup

S

+ Reasonable prices
+ Provision of Employment
+ Time management enabling
+ Passive income provision
+ Accessibility anywhere thanks to the online platform

W

- The product dependency on technology
- The impossibility of total controlling the teachers

O

+ Market position:
+ Absence of Direct competitors
+ The growth of importance of online platform:
+ Young people's growing interest towards education
+ Not up to date University education
+ Quantitative growth of modern professions

T

- Frustrated or dissatisfied students
- Possible shortage of teaching staff
- Establishment of separate platforms by teachers
- The emergence of new competitors

Market Research | Survey | Competitive & SWOT Analysis | Target Market | User Persona | Promise to the customer & UPS
Information Architecture | User Flow | Wireframing | Design System | Hi-Fi Mockups | Prototyping | Testing

TARGET MARKET DESCRIPTION

Target market description gives us a clear idea about the segment of consumers that are most likely to want or need our product.

Geographics

Student

- The product is intended mainly for the Armenian market.
- It can also be used by those living abroad who speak Armenian and want to take courses in Armenian.
- It can also be used by those living abroad who have a language barrier in the country they live, have difficulty or do not want to attend classes in another language

Instructor

- The product is intended mainly for the Armenian market
- It can be used by our compatriots living abroad who speak Armenian and want to teach in Armenian.

Behavioral

Student

- The user is actively using modern technology / smartphone, computer or laptop /
- Evaluates knowledge, learning, reads books, watches productive lessons, participates in events, creating interesting connections during them

Instructor

- The user uses modern technology
- He is always increasing his knowledge with new professional literature and materials
- He has a lot of work experience, likes to share his knowledge when students or friends need it

Demographics

Student

- It can be used by people over 18, but the segment of 18-48 years old is more targeted
- They can use the product regardless of their gender
- They can use the product regardless of their religious beliefs

Instructor

- It can be used by people over 18 years old, but the segment of 30-48 years old is more targeted
- They can use the product regardless of their gender
- They can use the product regardless of their religious beliefs

Psychographics

Student

- He always works to improve his personality, career growth, make the prospect of having a good future real.
- He is a conscious person who clearly values his knowledge, realizes his need to improve it
- He highly values his time

Instructor

- He is hardworking, curious
- He loves his profession
- He loves to teach
- He respects his students and cares for them
- He has a well-planned schedule and spends his time

Market Research | Survey | Competitive & SWOT Analysis | Target Market | User Persona | Promise to the customer & UPS
Information Architecture | User Flow | Wireframing | Design System | Hi-Fi Mockups | Prototyping | Testing

USER PERSONA

The UX of this product has a complex functional mechanism, because as we have seen, it deals with 2 types of Personas. Each of them is significantly different from the other, as they provide completely different functions.

● Let's see what characteristics have both our User Personas- the Instructor and the Student

PERSONA N1 - INSTRUCTOR

Full Name	Arthur Grigoryan
Age	28
Job	Senior Product Designer, Trainer
Location	Yerevan, Armenia

Despite the fact that Arthur got another profession, after graduating with a Master's Degree he voluntarily changed it, going deeper into the field of Product Design.

Arthur works full-time as a Product Designer. He is hardworking, loves his profession. He is very respectful of his students and takes other's opinions into account.

After work Arthur hurries home to start teaching. He wants the younger generation to take their education seriously. He wants to have his own teaching platform.

Arthur has many connections on Linkedin, receives positive feedback from various professionals. Arthur's motivation is the work he does. He has clear goals he moves towards.

PERSONA N2 - STUDENT

Ellen started working at the age of 18. She is interested in various fields. She studied different professions: Sociology, Graphic Design, Marketing, Product Design.

Covid changed Ellen's life significantly. Before that, she actively attended various events, liked to participate in various classroom courses. She went in for sports. Before pandemy she was actively attending gyms, but after that she bought fitness accessories and started exercising at home watching some Youtube channels.

She confesses that at first she wanted to study in the theater, then in the police academy, but in the end she ended up to apply to the faculty of Sociology.

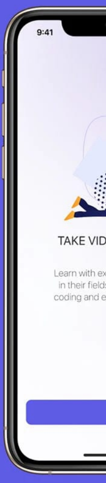
Ellen loves to study, is active, often participates in online classes. Familiar with Udemy, Coursera platforms.

Full Name	Ellen Mnatsakanyan
Age	26
Job	Junior Designer
Location	Yerevan, Armenia

Market Research | Survey | Competitive & SWOT Analysis | Target Market | User Persona | Promise to the customer & UPS

Information Architecture | User Flow | Wireframing | Design System | Hi-Fi Mockups | Prototyping | Testing

PROMISE TO THE CUSTOMER



FOR INSTRUCTOR:

- ○ Profitable work
- ○ Ability to sell the same content multiple times
- ○ Save time by not constantly explaining the same material

FOR STUDENT:

- ○ Optimal time management
- ○ Qualitative knowledge
- ○ Reasonable price for qualitative content

UNIQUE SELLING PROPOSITION

FOR INSTRUCTOR:

- ○ The instructor gets an alternative or main job with the possibility of selling the same content multiple times.

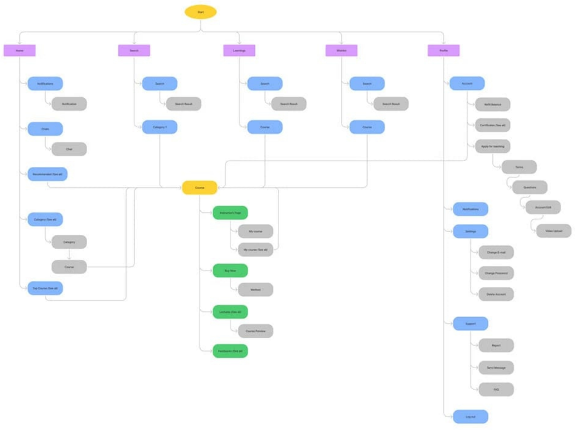
FOR STUDENT:

- ○ The student gets professional content at reasonable market prices (or free of charge).

Market Research | Survey | Competitive & SWOT Analysis | Target Market | User Persona | Promise to the customer & UPS
Information Architecture | User Flow | Wireframing | Design System | Hi-Fi Mockups | Prototyping | Testing

INFORMATION ARCHITECTURE

The Information Architecture is a visual representation of the product's infrastructure, features, and hierarchy. And thus it's a key for our further steps



JUST ENJOY THE PROCESS AND FINAL LOOK :)

The Information Architecture is a visual representation of the product's infrastructure, features, and hierarchy.

Market Research | Survey | Competitive & SWOT Analysis | Target Market | User Persona | Promise to the customer & UPS
Information Architecture | User Flow | Wireframing | Design System | Hi-Fi Mockups | Prototyping | Testing

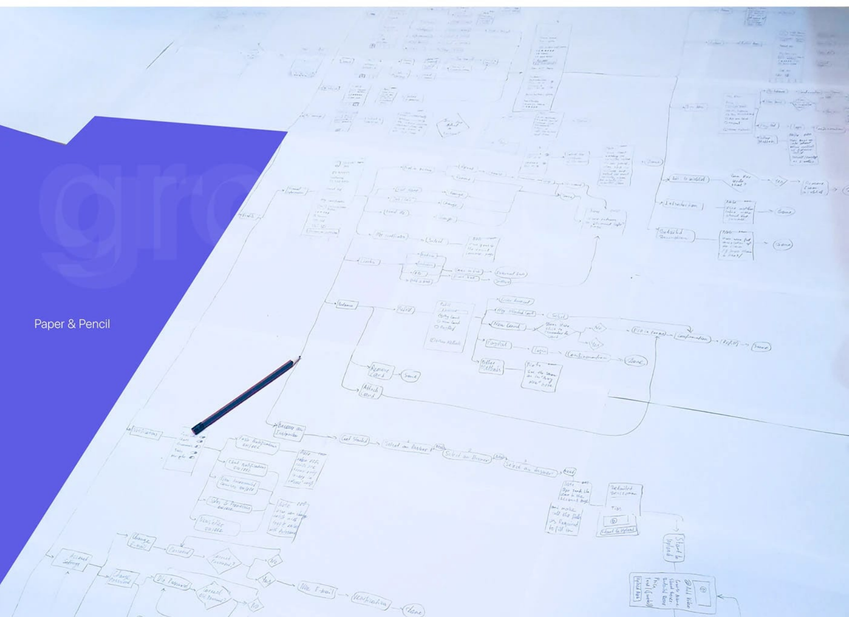
USER FLOW

User Flow is the path the user will take through the app to achieve a certain goal. Our user flow's final look is like this but it has passed through paped-based and digitalized lives

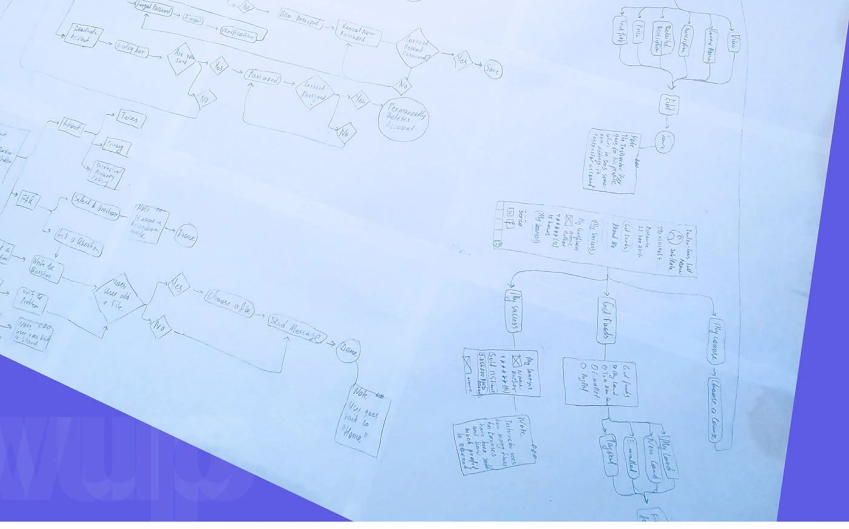
● Let's see the process and final result of the User Flow of our app

PROCESS OF MAKING USER FLOW

As you know bright ideas are created on common paper. At first User Flow was designed that way, then it was digitized.



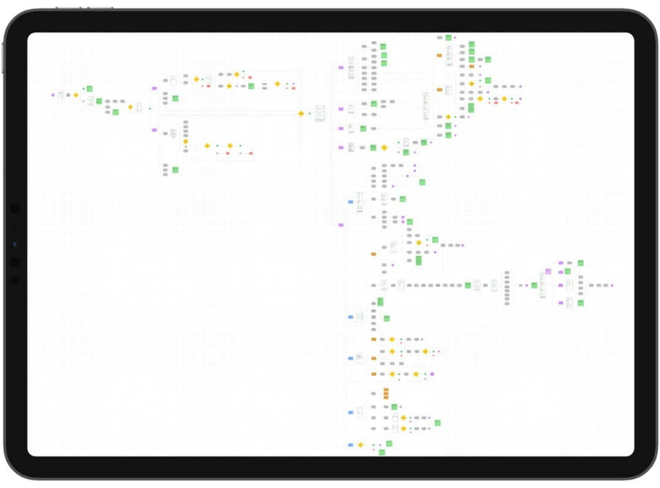
Paper & Pencil



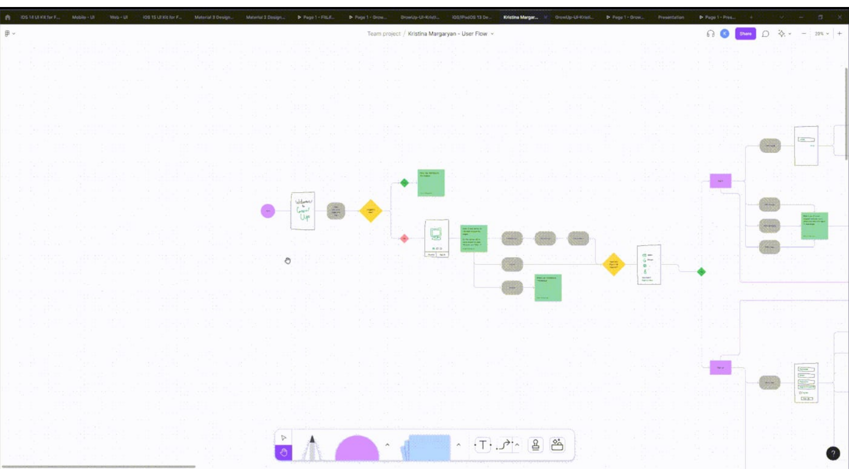
FINAL RESULT

After all drawings and notes were done, User Flow was digitized.
The process was done with FigJam

FigJam



Here is a short recording of the process and final look of User Flow of our "Growup"



Market Research | Survey | Competitive & SWOT Analysis | Target Market | User Persona | Promise to the customer & UPS
Information Architecture | User Flow | Wireframing | Design System | Hi-Fi Mockups | Prototyping | Testing

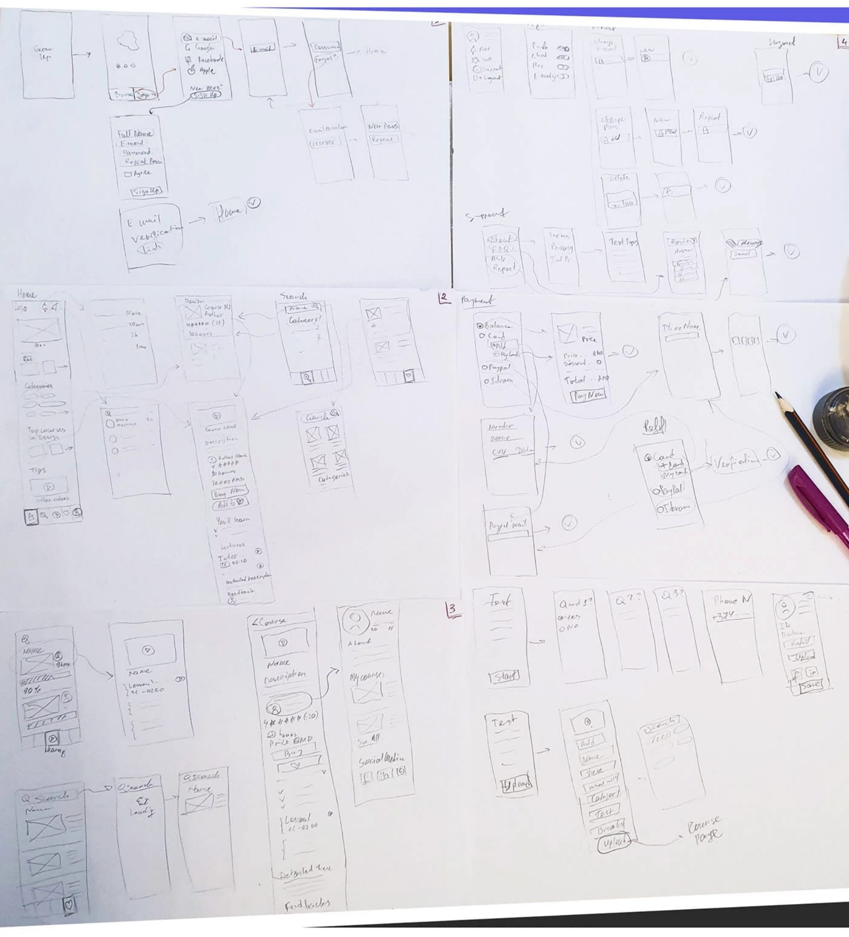
WIREFRAMING

Our wireframing passed the traditional 3 types of stages: Low-fidelity, Mid-fidelity and High-fidelity. Let's see Low and Mid ones. The High-fidelity mockups we will see later.

● Let's see the process the wireframes have passed through. Lo-Fi and Mid-Fi mockups are shown above.

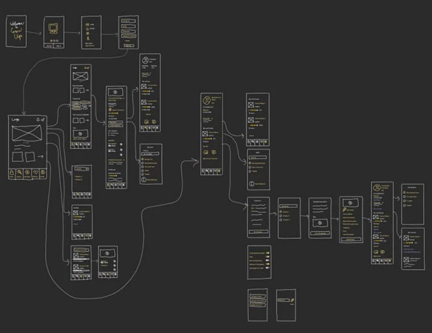
LOW-FIDELITY

At first Low-Fidelity Wireframes were designed on paper with common pencil. Then initial Prototypes were pointed with some arrows, circles and lines.



MID-FIDELITY

After Lo-Fi Mockups had been done they were transfered from paper to digital life, making Mid-Fidelity Mockups.



Then after all polishes were done, wireframes were designed with Balsamiq tool.

balsamiq

DESIGN SYSTEM

For creation of our Design System for iOS platform, Apple Human Interface Guidelines were mostly kept and used.

Let's see the set of standards that our Design System defines.

APP ICON

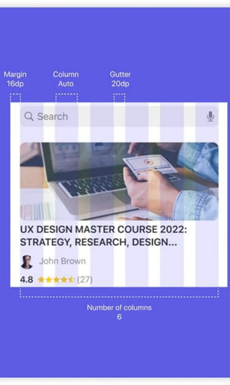
The App Icon of growup application includes "g" for "grow" and "u" for "up" letters and also an up arrow that indicates growth. It represents the professional growth the student is going to gain.

It consists of 2 colors. Main letters are simple black and the key element - arrow has the main shade of purple

GRID SYSTEM

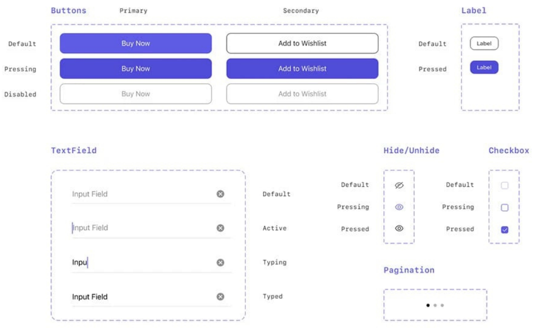
The layout grid is made up of three elements: columns, gutters, and margins. Its type is set as Stretch

Number of columns of used grid system is 6, margins are 16dp and gutters' width is 20dp and as the grid's type is stretch so the columns widths are auto set.



UI COMPONENTS

One of the main parts of Design System is UI Kit with its components. They were designed with all posible interactive states



And many others...

COLORS

Here are the colors that were chosen. The main color is the first one shown below. Others are used for different states and arrangement.

#5E5CE6	#504CD8	#1D1D1D	#DD1F15	#00AD2C

TYPOGRAPHY

As main fonts SF Pro Text and SF Pro Display were chosen with their 3 weights. They are very practical and easy to read

SF PRO TEXT

Light
Regular
Bold

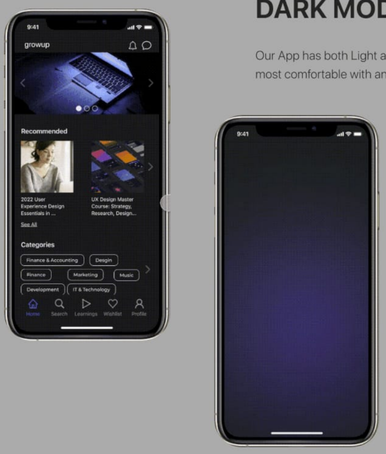
Aa Bb Cc Dd Ee Ff Gg Hh Ii Jj Kk Ll Mm Nn Oo Pp Qq Rr Ss Tt Uu Vv Ww Xx Yy ZZ

SF PRO DISPLAY

Aa Bb Cc Dd Ee Ff Gg Hh Ii Jj Kk Ll Mm Nn Oo Pp Qq Rr Ss Tt Uu Vv Ww Xx Yy ZZ

ICONS

Icons are main visual elements of the interface and it's important to set such icons that the functionality of the one you choose could define the functionality behind the icon. Flat and line icons were chosen for our app.



DARK MODE

Our App has both Light and Dark Modes. Choose the one you are most comfortable with and enjoy it

USABILITY TESTING

After all processes above were done the app had to be tested to make us sure that users are comfortable with using it. So an interactive prototype was made and shared with users.

Test showed that 84.6% of our test users reported positive interaction with the interactive prototype of the app.

For usability testing Maze platform was used.
