CONNECTIN ENERGY

Development of identity, UX, UI, website and application for communication between clients and contractors in the field of gas and oil production and industry!

research, surveys, and product testing were conducted to find all the important needs of the three sides of the resource. The client is the one who is looking for his task to be completed. A contractor is someone who is looking for projects and proven honest customers (clients). The owner of this resource, which makes it possible to communicate honestly and correctly to the client and the customer + monetize this project!

ABOUT US

Imagine a world where finding top-tier drilling services is as effortless as clicking a button. A world where clients can seamlessly post tasks and instantly connect with the best service providers in the industry. Welcome to ConnectinEnergy, where innovation meets expertise to help the drilling and completion industry thrive.

Picture the ease of discovering the perfect solution, knowing your service partner will deliver outstanding results. This vision of a seamless, confident experience inspired the creation of ConnectinEnergy.

We designed ConnectinEnergy to make finding reliable solutions simple and stress-free. Believing in equality and fairness, our platform ensures that every service provider, regardless of size, has an equal opportunity to succeed. Our goal is to create a seamless and positive experience for both clients and service providers.

ConnectinEnergy operates as a digital marketplace where clients can easily post their technical tasks. Once a task is posted, service providers with relevant expertise can respond with their proposals, including timelines, applicability for conditions and availability in the region. Clients can then compare these proposals, communicate directly with providers through the platform, and select the best fit for their needs.

HOW IT WORKS

A short video presentation of how it works for the contractor and the client. Select the status you are interested in and start the video)

Client
This is you if you are looking for a performer and want to place your task for its implementation.

Contractor
This is if you are a company or organization with the experience and means to complete tasks in this area.

BENEFITS

Enjoy streamlined, cost-effective, and targeted solutions for connecting clients with service providers

1 **Efficiency**
The platform makes it faster and easier to connect clients with service providers, saving time that would otherwise be spent on cold calls, in-person meetings, and networking.

2 **Broader Reach**
Service providers can reach a wider range of potential clients beyond their local networks, expanding their market and opportunities.

3 **Cost effectiveness**
Reduces the need for expensive travel, physical sales presentations, and marketing materials by moving interactions online.

4 **Transparency**
Clients can easily compare multiple service providers based on reviews, ratings, and detailed proposals, leading to more informed decisions.

5 **24/7 Access**
Clients and service providers can use the platform anytime, removing the limits of traditional business hours and locations.

6 **Equal Opportunity**
Small and medium-sized service providers get the same visibility and chance to compete for projects as larger companies.

7 **Relevance**
Clients receive targeted suggestions tailored to their specific needs, eliminating the need for cold presentations and irrelevant offers.

MADE BY ENGINEERS FOR ENERGY PROFESSIONALS

Our team knows how difficult it is sometimes to find the right solution. This platform will solve it. Hundreds of cases from searching for digital solutions or new downhole technology to scrapping used material

SOLUTIONS

At the development stage, you have a good opportunity to use the service absolutely for free!
