HENRY OYIBOTHA

PRINCIPAL PRODUCT DESIGNER | UX STRATEGY | DESIGN SYSTEMS | PRODUCT LEADERSHIP

+1 972-940-3213 | designhq07@gmail.com | linkedin.com/in/henry-o-3021a7263 | henryoyibotha.vercel.app

PROFESSIONAL SUMMARY

Principal-level Product Design leader with 17+ years of experience shaping enterprise, consumer, fintech, healthcare, media, cloud, and productivity products. Combines UX strategy, product discovery, systems thinking, research, interaction design, design systems, accessibility, and executive stakeholder influence to simplify complex workflows and turn ambiguous business problems into scalable digital experiences. Proven record of improving engagement, task efficiency, feature adoption, design-to-development velocity, and accessibility while mentoring designers and partnering closely with Product, Engineering, Research, Data, and business leadership.

CORE SKILLS & EXPERTISE

Product Design Leadership: Product Vision, Product Strategy, UX Strategy, Experience Strategy, 0-to-1 Product Design, Product Discovery, Design Thinking, Systems Thinking, Design Principles, Design Critique, Design Operations (DesignOps), Design Maturity, Mentoring & Coaching, Executive Storytelling, Stakeholder Management, Cross-Functional Leadership, Workshop Facilitation, Roadmap Influence

UX Research & Discovery: Generative Research, Evaluative Research, User Interviews, Contextual Inquiry, Usability Testing, Concept Testing, Customer Journey Mapping, Service Blueprinting, Personas, Jobs-to-be-Done (JTBD), Task Analysis, Heuristic Evaluation, Competitive Analysis, Research Synthesis, Problem Framing, Opportunity Mapping, Hypothesis Development

Interaction & Experience Design: Interaction Design, Information Architecture, User Flows, Wireframing, Rapid Prototyping, High-Fidelity Prototyping, Responsive Web Design, Mobile Product Design, Enterprise Workflows, Dashboard UX, Navigation Models, Microinteractions, Visual Hierarchy, Design Specifications, Design QA, End-to-End Customer Experience (CX)

Design Systems & Governance: Enterprise Design Systems, Design Tokens, Component Libraries, Pattern Libraries, Figma Variables, Reusable Components, Design System Governance, Contribution Models, UI Standards, Interaction Patterns, Documentation, Design-to-Code Collaboration, Cross-Product Consistency, Design System Adoption, Scalable Experience Architecture

Accessibility & Inclusive Design: WCAG 2.2, Inclusive Design, Accessible Interaction Patterns, Keyboard Accessibility, Screen-Reader Considerations, Color Contrast, Focus States, Accessibility Reviews, Accessibility Design QA, Responsive Accessibility, Usability for Diverse Users, Compliance-Aware Product Design

Product Analytics & Experimentation: Product Analytics, KPI Definition, Success Metrics, Telemetry, Funnel Analysis, Feature Adoption, Engagement Metrics, Task Success, Time-on-Task, Conversion Optimization, Experiment Design, A/B Testing, Data-Informed Design, Behavioral Insights, Post-Launch Optimization, Outcome-Based Design

Enterprise, AI & Domain Experience: Enterprise SaaS, B2B & B2C Products, Complex Enterprise Workflows, Cloud & Productivity Products, FinTech, Digital Banking, Wealth Management, Healthcare UX, Media Platforms, Consumer Products, AI-Enabled Product Experiences, Human-AI Interaction, Generative AI UX, Conversational UX, Trust & Explainability, AI-Assisted Prototyping

Tools, Delivery & Collaboration: Figma, FigJam, Adobe Creative Cloud, Miro, Jira, Confluence, Agile Product Development, Scrum, Lean UX, Product Requirements Collaboration, Developer Handoff, Design Documentation, Design Reviews, Design Sprints, Remote Collaboration, Product-Engineering Partnership

PROFESSIONAL EXPERIENCE

Amazon **Oct 2023 – Present**

Senior Product Designer / Lead UX

- Lead end-to-end product design for complex customer and enterprise workflows, owning discovery, experience strategy, interaction design, prototyping, usability validation, accessibility, and launch-quality design across web-based product surfaces.
- Reframe ambiguous product problems through customer interviews, journey mapping, task analysis, and product data, contributing to experience improvements that increased customer engagement by up to 38% and reduced task completion time by up to 45%.
- Evolve reusable design-system patterns, component behavior, and interaction standards in Figma, improving consistency across multiple product areas and reducing avoidable design-to-engineering rework by approximately 30%.
- Partner with Product, Engineering, Research, Analytics, and business leaders to define product requirements, success metrics, trade-offs, and phased experience roadmaps for high-visibility initiatives.
- Champion inclusive design and WCAG-aligned interaction patterns; drive accessibility reviews and design QA that support compliance levels approaching 98% across targeted experiences.
- Mentor designers through critiques, systems thinking, storytelling, and execution reviews while using rapid and AI-assisted prototyping techniques to accelerate exploration and stakeholder alignment.

Microsoft **Apr 2021 – Oct 2023**

Senior Product Designer

- Designed cloud, AI, and productivity experiences from early concept through launch, translating complex technical capabilities into intuitive workflows for enterprise and end-user audiences.
- Scaled shared components, patterns, and design-system guidance across product surfaces, helping improve design-to-development efficiency by up to 40% and reducing recurring UX inconsistencies by approximately 25%.
- Used research, usability testing, telemetry, and iterative prototyping to refine onboarding and core workflows, contributing to feature-adoption gains of up to 34% and faster time-to-value for new users.

- Partnered closely with PM, Engineering, Research, Content Design, and Accessibility teams to align experience strategy with platform constraints, customer needs, and measurable product outcomes.
- Supported high-scale digital experiences reaching 20M+ global users while maintaining strong standards for responsive behavior, accessibility, interaction quality, and design consistency.
- Presented future-state concepts, design rationale, trade-offs, and research findings to senior stakeholders, building alignment around roadmap priorities and customer-centered product decisions.

JPMorgan Chase **May 2020 – Apr 2021**

Lead Product Designer

- Led product design for digital banking and wealth-management journeys, balancing customer needs with regulatory, security, risk, and business requirements in a highly governed financial environment.
- Mapped end-to-end customer journeys and redesigned high-friction flows, reducing avoidable steps by approximately 25% and improving task-success rates by an estimated 20% in targeted experiences.
- Established reusable UX patterns and design-governance practices that improved consistency across product teams and shortened design review and handoff cycles by approximately 20%.
- Facilitated discovery workshops with Product, Engineering, Compliance, Operations, and executive stakeholders to clarify problem statements, prioritize opportunities, and align experience strategy to business outcomes.
- Directed user research, prototyping, usability testing, accessibility reviews, and design QA to validate complex financial interactions before development and release.

Ringier AG **Jun 2017 – May 2020**

Product Design Manager

- Managed product design initiatives across digital media platforms, setting UX direction, design quality standards, research practices, and delivery expectations for multidisciplinary product teams.
- Built and governed a shared design system with 40+ reusable components and patterns, reducing duplicated UI work by approximately 30% and improving cross-product visual and interaction consistency.
- Introduced structured discovery, design critique, and usability-testing practices that reduced late-stage UX changes by approximately 25% and improved stakeholder confidence in product decisions.
- Partnered with editorial, commercial, product, engineering, and analytics teams to translate audience behavior and business objectives into roadmaps, experiments, and customer-centered digital experiences.
- Mentored designers and standardized documentation, handoff, and design QA practices to strengthen craft quality and improve delivery predictability across concurrent initiatives.

Wolff Olins **Feb 2015 – Jun 2017**

Graphic Designer

- Created brand identity systems, digital experiences, integrated campaigns, and visual frameworks for global clients, translating brand strategy into consistent customer-facing experiences across digital and physical touchpoints.
- Developed modular visual systems spanning 5+ channel types, improving asset reuse and reducing campaign adaptation effort by approximately 25% across recurring marketing and digital deliverables.
- Partnered with strategists, writers, digital teams, and client stakeholders to move concepts from exploration through production while maintaining brand consistency across multi-market programs.
- Improved creative production efficiency by approximately 20% by establishing reusable templates, clearer asset standards, and more structured review cycles for high-volume brand work.

Johnson & Johnson **May 2012 – Feb 2015**

Digital Product Designer

- Designed healthcare and patient-facing digital experiences, translating clinical, business, and user requirements into accessible journeys, wireframes, prototypes, interaction models, and production-ready UI.
- Conducted user research and usability testing that identified high-friction interactions and contributed to an estimated 20% improvement in completion rates across prioritized patient and support workflows.
- Created reusable interface patterns and documentation that reduced repeated design effort by approximately 25% and strengthened consistency across responsive healthcare experiences.
- Collaborated with Product, Engineering, Legal, Compliance, and subject-matter experts to support Agile delivery while maintaining usability, accessibility, privacy, and brand standards.
- Facilitated design reviews and validation sessions to resolve requirements early, reducing late-stage rework by approximately 20% on selected digital initiatives.

Foolproof **Aug 2010 – May 2012**

UX Strategist / Service Designer

- Led UX strategy and service-design engagements for global enterprise clients in aviation, financial services, and telecommunications, converting complex operational challenges into coherent end-to-end customer experiences.
- Facilitated stakeholder workshops, contextual research, journey mapping, and service-blueprinting activities across 3 major industry sectors to identify unmet needs, process gaps, and high-value experience opportunities.
- Validated concepts through user research and prototyping, helping reduce critical usability issues by approximately 30% before development on selected client programs.
- Created experience principles, information architectures, service blueprints, and product recommendations that improved cross-functional alignment and shortened decision cycles by approximately 20%.

- Presented evidence-based recommendations to senior client stakeholders and partnered with delivery teams to translate strategy into practical product requirements and scalable experience patterns.

SBI Media **Mar 2009 – Aug 2010**

Graphic Designer & Social Media Designer

- Delivered branding, advertising, marketing, and digital design assets for agency and client campaigns across social, web, print, and promotional channels.
- Produced multi-format creative packages across 4+ channel types, improving brand consistency and enabling faster adaptation of campaign assets for recurring client needs.
- Introduced reusable templates and asset organization practices that reduced routine production time by approximately 20% and supported more consistent turnaround across active accounts.
- Collaborated with account, copy, marketing, and production teams to interpret briefs, present creative concepts, incorporate stakeholder feedback, and deliver final assets on schedule.

EDUCATION & CERTIFICATION

UI/UX Certificate – The University of Texas at Austin, McCombs School of Business
B.A., Fine & Applied Art – Delta State University
